

242 Final Project Manual Testing (Week 2)

First, open up the android applications, The program you're looking for is called Final_Project, displayed below.

Once it loads, you should see the splash screen, which holds the name of the project, the logo, and the authors, displayed below.

CS 242 Final Project

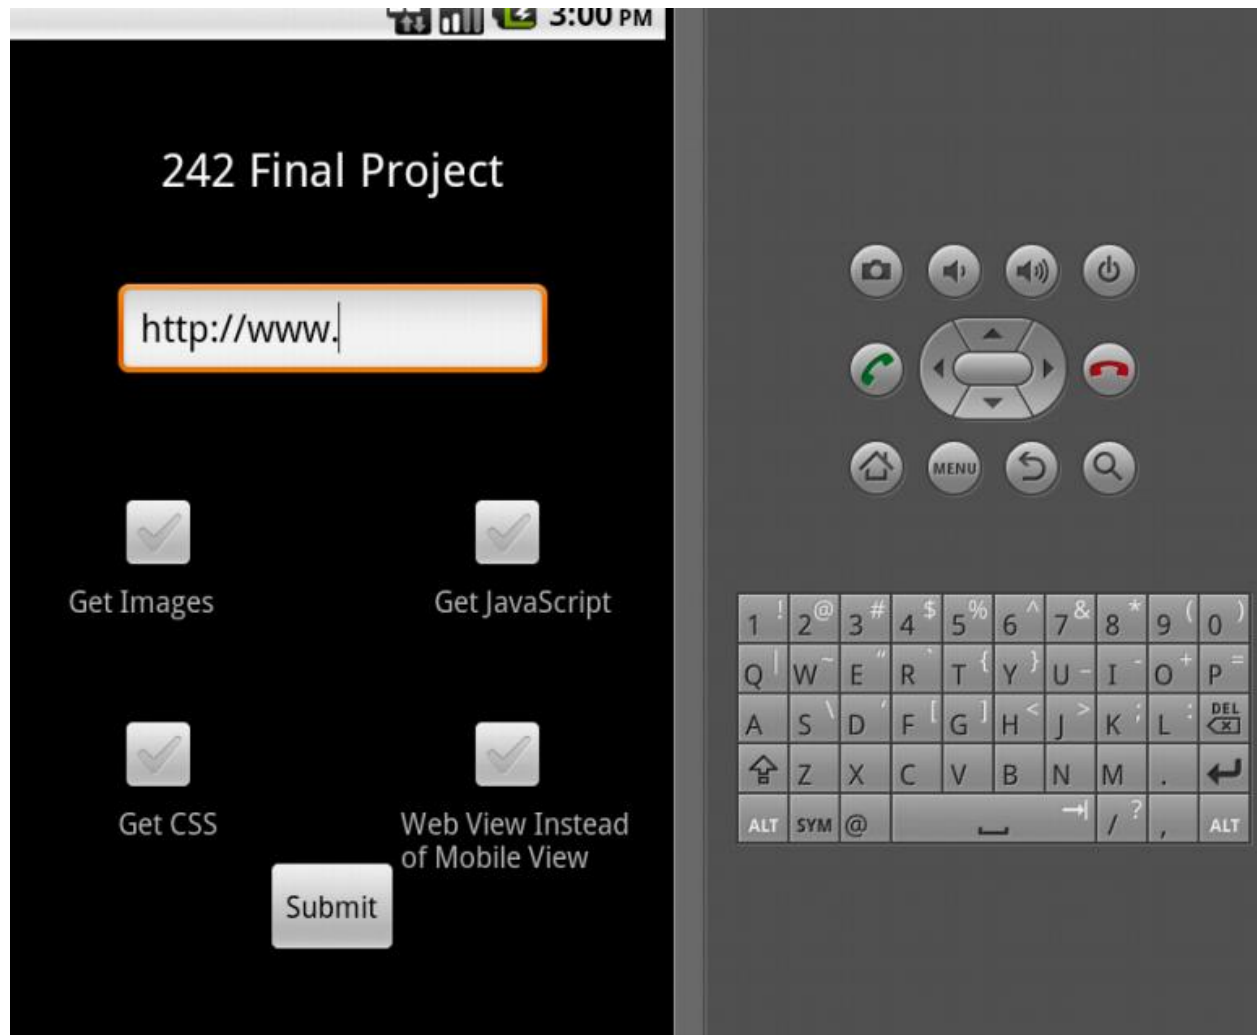

Jeff Bailey, Devin Bhushan, Siddharth Gandhi

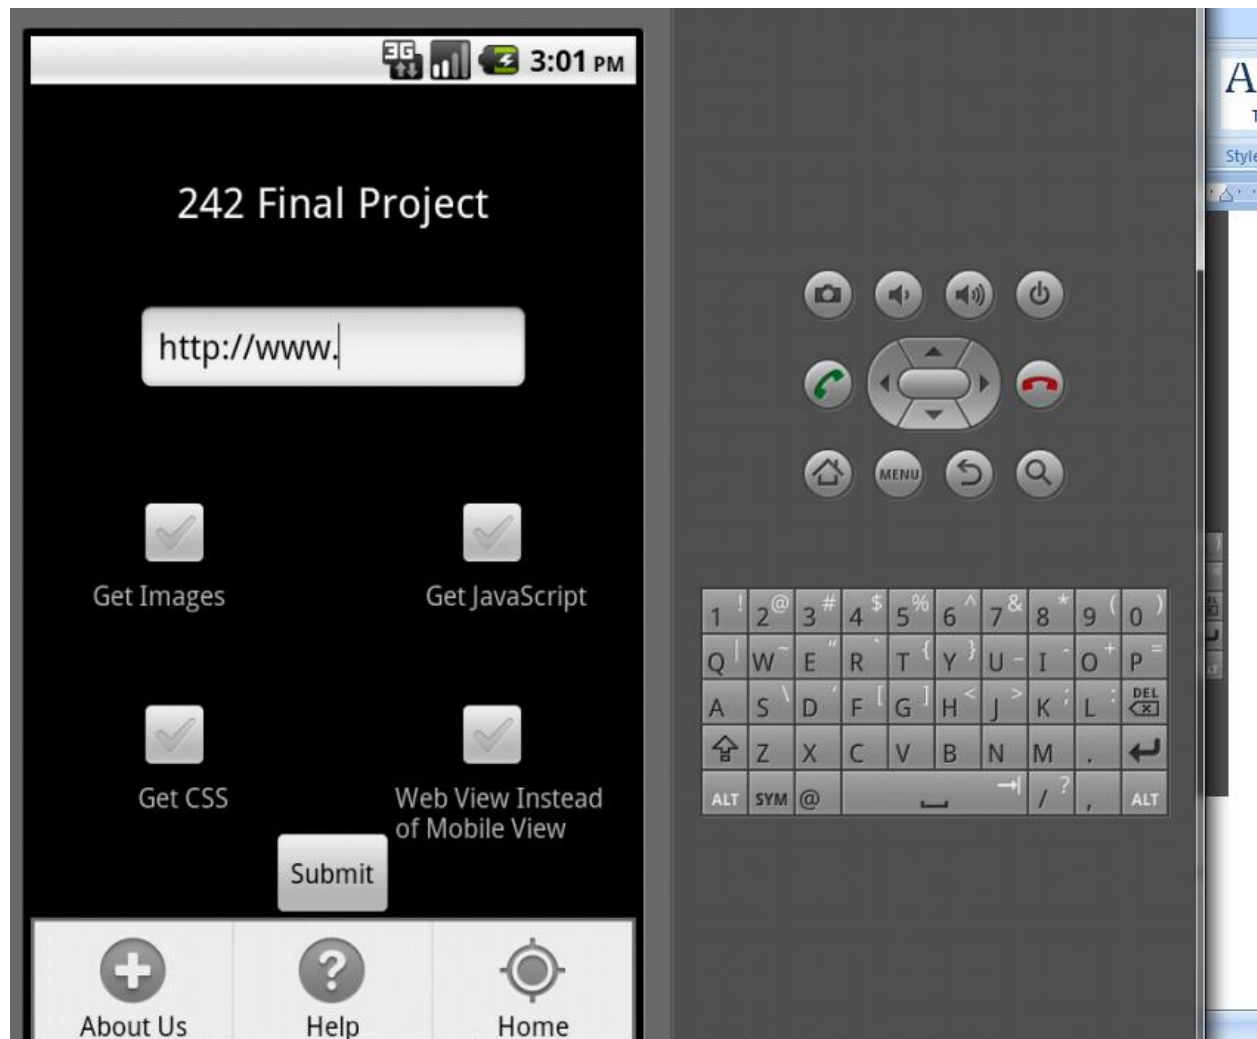

1	!	2	@	3	#	4	\$	5	%	6	^	7	&	8	*	9	(
Q		W	~	E	"	R	`	T	{	Y	}	U	-	I	-	O	+
A	S	\	D	'	F	[G]H	<	J	>	K	;	L	:		
⌂	Z	X	C	V	B	N	M	.									
ALT	SYM	@															

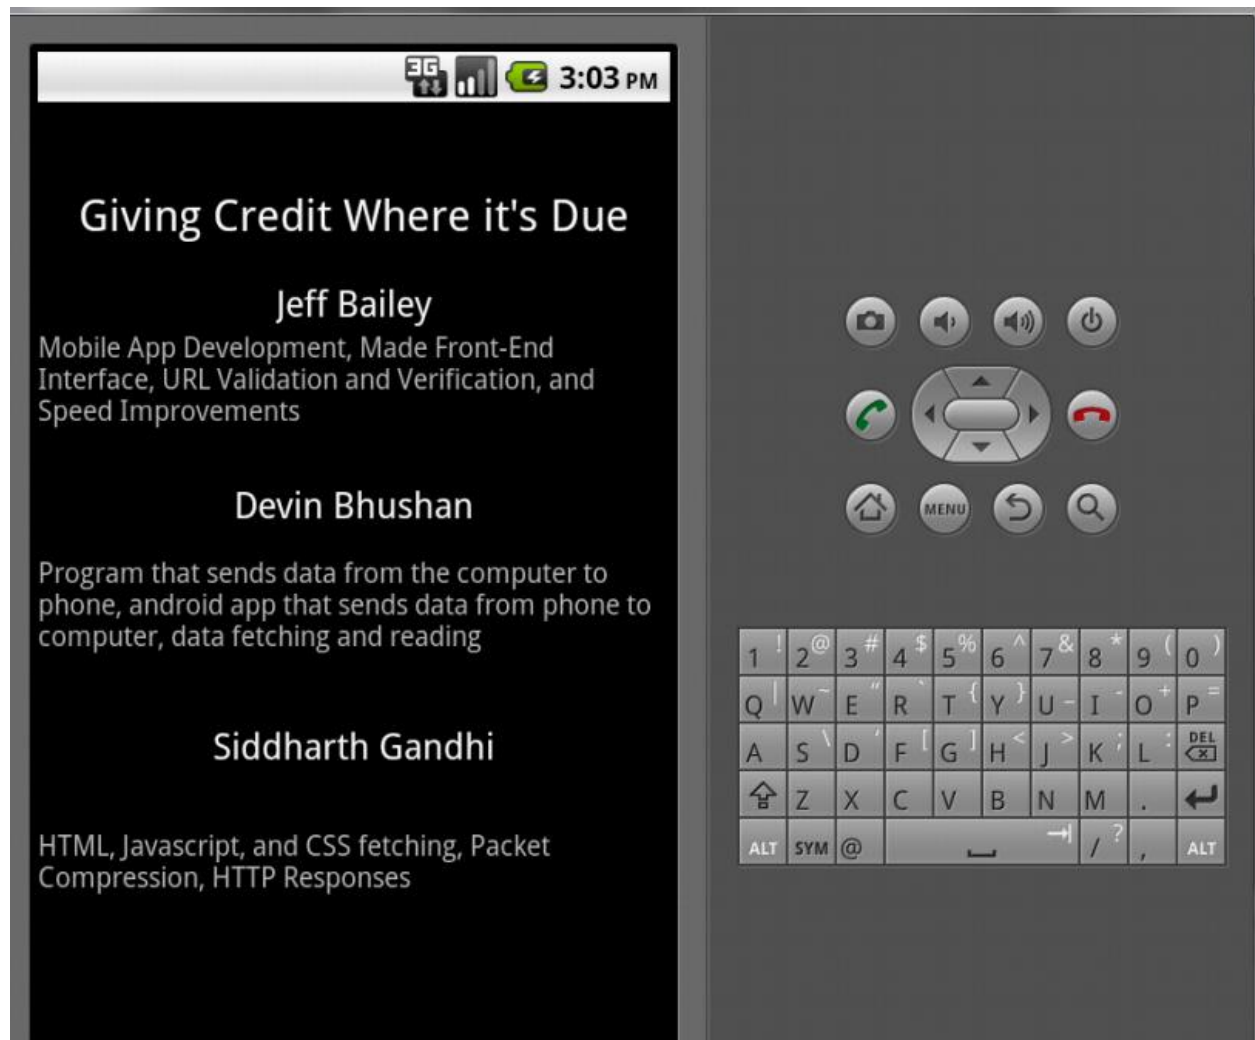

After 2 or 3 seconds, It'll load the main screen, which looks like the below.

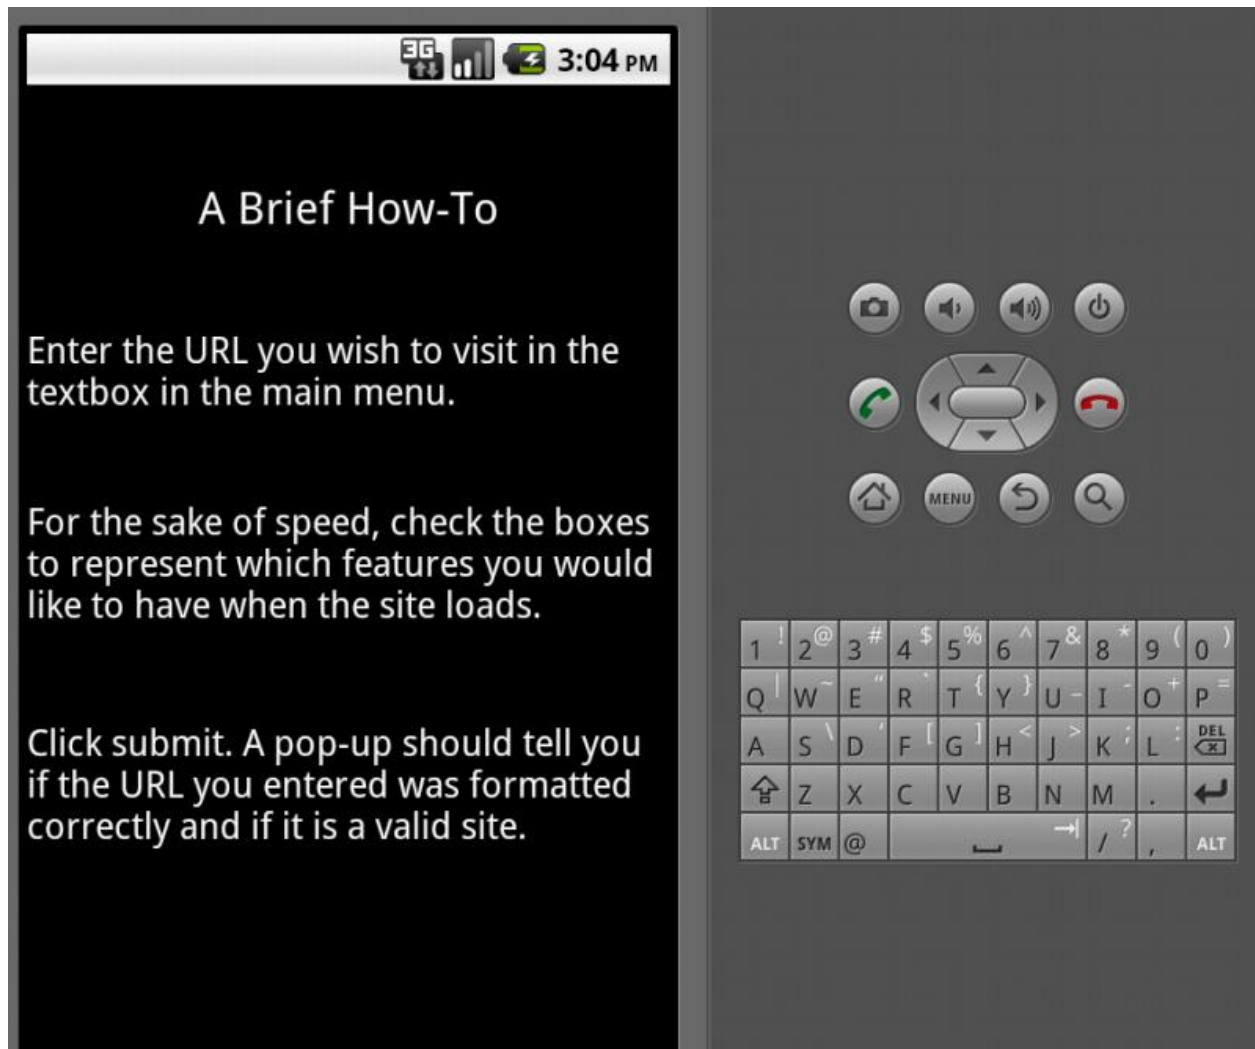

The text field is where the URL is input, and the checkboxes establish what the user wants to fetch with the html, primarily for the sake of optimization, but possibly for the sake of the user's preference. If you hit menu, the below appears.

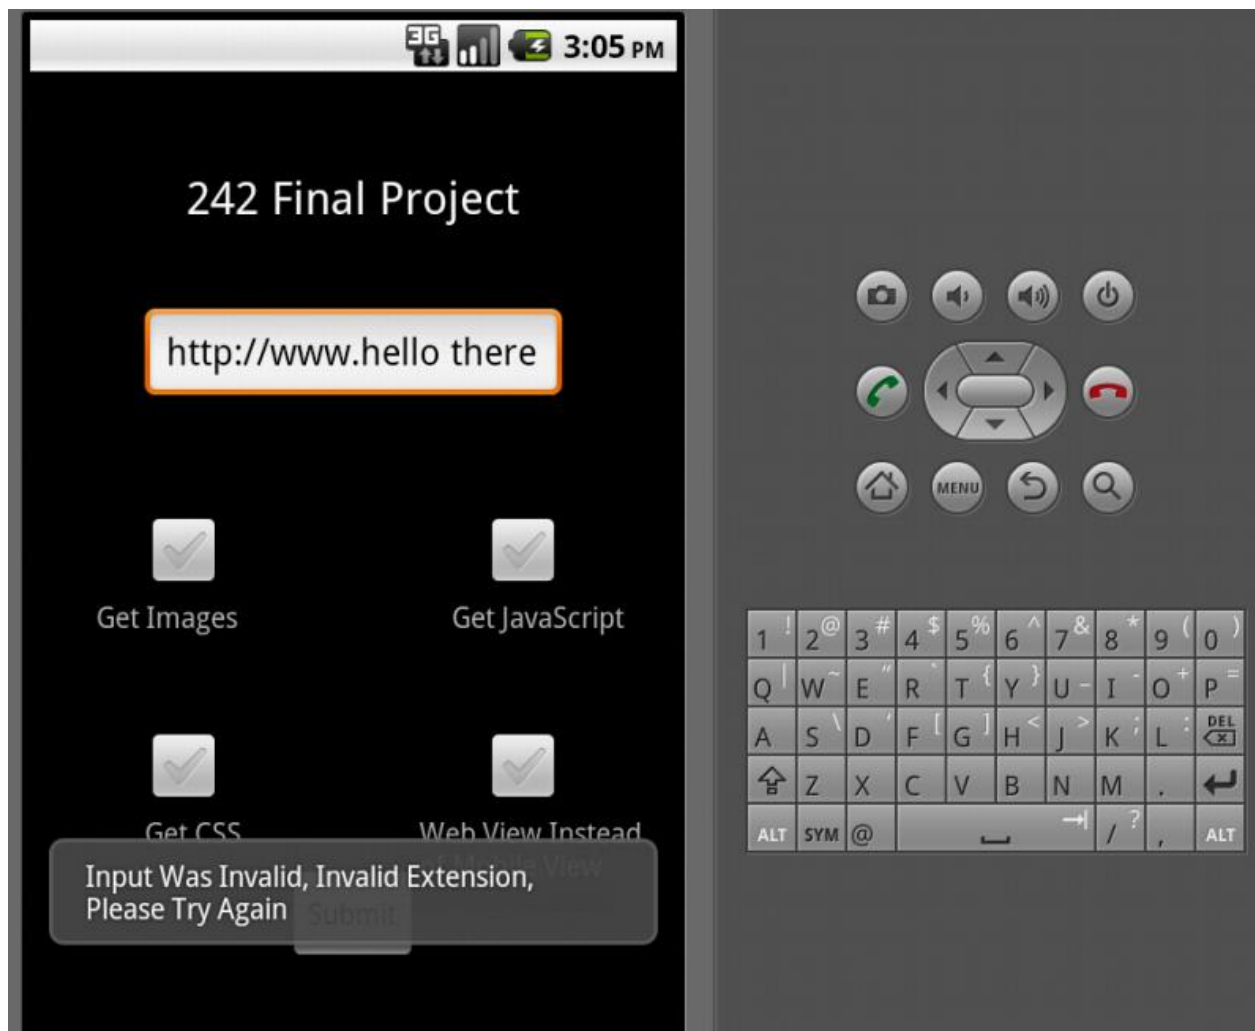

This menu applies to all three of the main pages of the app. The link to the current page is dead to avoid senselessly re-loading it, but the links to the other two pages are active. If you click about us...

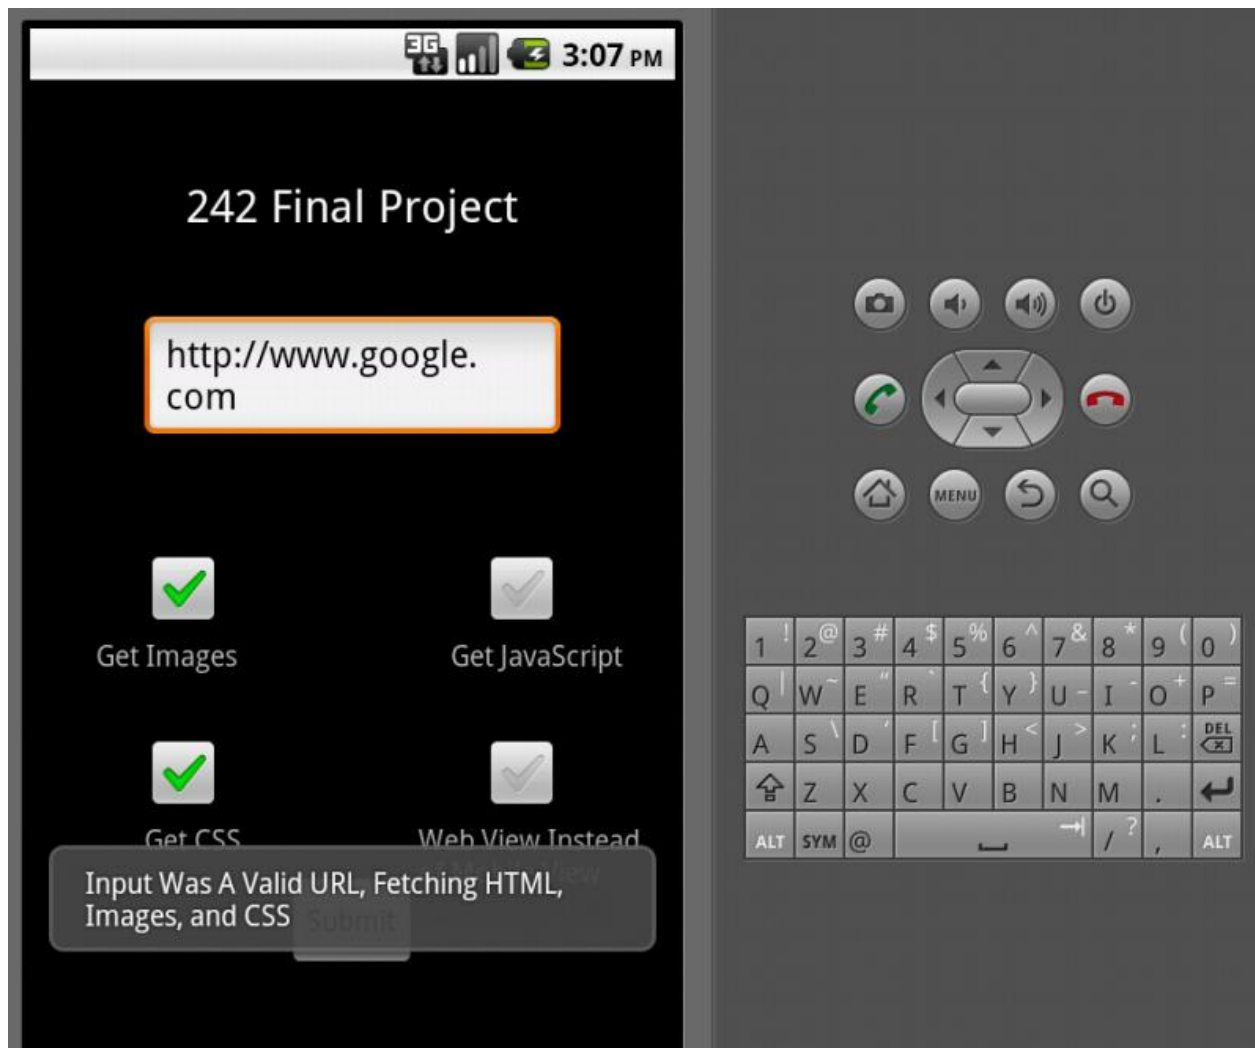

That appears, showing who did what, or at least the major parts each person has contributed. If I re-open the menu and load the tutorial page...

Which explains what the user should do to run the application. Now going back to the main menu, if I were to input an invalid formatted site...

It failed because the web site wasn't correctly formatted. Now if I were to format it correctly...

Notice how it not only says it's valid, it notifies you that it's only fetching what you asked for.
